EG-MULTIFUEL

FUELS:

PELLET WOOD CHIPPINGS SAWDUST WHEAT SHAVINGS FRUIT KERNELS NUTS

Dedicated for effective burning of biomass, multi-fuel EG-MULTIFUEL contains solutions of best devices that are available among boilers. The burning of biomass has never been so easy! The device is designed in a way to ease and limit the operation and maintenance to necessary minimum.

- 5 5 YEAR WARRANTY*
- ENERGY-SAVING
- ECOLOGICAL
- EASY TO USE
- MULTI-FUEL
- AUTOMATIC ASH REMOVAL SYSTEM

* for the robustness of the exchanger and the welding joints

Ability of using multiple types of fuel as well as many other solutions to feed and store the fuel ensure that EG-MULTIFUEL boiler proves itself in all working conditions.

The optimal burning process - regulated by an advanced controller - ensures a synchronic fuel feed to the combustion chamber and in the meantime removal of ash that has been created during the combustion process. Thanks to this solution it is possible to use a fuel of high volume and lower calorific value. The installed ceramic high diameter combustor as well as innovative solutions inside the heat exchanger enable to effectively burn any types of biomass used by the customer
